

CORPORATE COUPON PROGRAM

Protect the Health of Your Workforce

As the nation's leading flu shot provider, Maxim Health Systems understands the importance of protecting your workforce from the flu. Unlike the common cold, the flu can leave a person unable to function for several days and when one person becomes ill, the virus is likely to spread.

Companies across the globe are plagued by the financial implications of the flu. On average, unscheduled absences cost employers \$602 for every employee annually. As these expenses are likely to increase in the coming years, preventive measures to fight the flu are important to your company's future success.

By joining the thousands of other businesses who offer on-site flu shots and other wellness services to their employees, you will increase productivity and workplace morale, while cutting medical costs and reducing employee absenteeism.

Make Flu Immunizations Available to All Employees with Flu Shot Coupons

Maxim Health Systems now offers a benefit in addition to the traditional on-site immunization program. Our Corporate Coupon Program allows employees who are unable to attend the on-site program, as well as employees who work from home or in office locations with only a few employees, an opportunity to receive a shot. With this online program, employees who cannot attend your company's clinic can use a coupon to obtain a flu shot offered at any of Maxim's thousands of nationwide public flu shot clinics hosted in retail pharmacy and grocery stores, places of worship, etc.

Coupons can be accessed by visiting www.findaflushot.com/coupons/. Employees simply enter a unique company ID and password. They are then given access to create an individual profile by registering with information that you determine necessary. The user then creates a coupon and is able to view all of the available locations for the coupon to be redeemed. Once this coupon is redeemed and returned back to Maxim, it is scanned and logged for billing purposes. This highly streamlined system can provide customized reporting at the time of billing, making it easy for your company to determine the usage of the coupons.

Included in the reports are:

- Invoices
- Number of total participants
- Any and all registration data
- Location of clinic, date, and time of coupon redemption
- And more...

As a company's Flu Clinic Administrator, you have access to many other features. Not only do administrators have access to more tools to help maintain the program, but they can also print coupons for those who do not have access to email or an email address. This allows all employees to benefit from the program, regardless of email access.

Your security is paramount to the success of Maxim's coupon program. The printed fields on the coupon are generated from the information the user enters during the registration process. This helps protect against fraudulent coupons since each coupon creation requires an account and a unique email address. As another added security feature, Maxim has the ability to limit accounts to be created within domains provided by our client. In addition, the text on the coupon image cannot be edited and the bar code technology helps safeguard from duplicate copies. Coupon redemption also requires the user to present the Maxim nurse with a photo ID, as a final protection against coupon fraud.

Join the growing list of corporations who have already made Maxim their corporate flu shot provider.
